Classification: Project Documentation — For Academic Submission

Empathy Map Canvas

1. Introduction

This document presents the Empathy Map Canvas for the primary users of the **ShopEZ MERN E-Commerce Application**. The analysis helps understand customer needs, expectations, shopping behavior, and challenges faced while purchasing products online.

2. Persona 1 — "The Online Shopper"

PERSONA 1

Name: The Convenience-Seeking Shopper

Profile:

A customer aged 18–45 who prefers online shopping for convenience and variety. The user expects easy product browsing, secure payments, quick delivery, and a smooth shopping experience.

21 Empathy Map— Quadrant Chart

22 Detailed Dimension Analysis

□ THINK & FEEL

- ♦ I want quality products at affordable prices
- ♦ I need a secure and simple shopping experience.
- ♦ I expect fast delivery and reliable service.
- ♦ I want easy returns and refund options.

👂 HEAR

4. Persona Comparison Summary

Dimension	Persona 1— Shopper	Persona 2--- Administrator
Primary Goal	Buy products easily	Manage store efficiently.
Core Pain	Complex shopping process.	Inventory & order management.
Core Gain	Fast and secure shopping.	Centralized dashboard.
Platform Feature Needed	Search, Cart, Payment.	Product & Order Management
Tech Enabler	React, JWT, MongoDB	Node.js APIs, MongoDB

5. Conclusion

The Empathy Map analysis highlights the needs of both customers and administrators. Customers require a simple and secure shopping experience, while administrators need efficient tools for managing products and orders. ShopEZ addresses these needs through a user-friendly interface, secure authentication, order tracking, and an admin dashboard.
